Labelling system

With Lista Script in three steps to perfect labelling

Using the advanced labelling system Lista Script all Lista products and many partition materials can be simply and clearly labelled. The labelling software can be downloaded easily from the Lista website free of charge. The labels adapted for the software are available as A4 sheets of paper and can be used in any commercially available printer. There are almost no limits to the ways you can design labels.

1. Designing

Design the label using Lista Script labelling software (Software can be downloaded at www.lista.com/script)

2. Printing

Print the labels on Lista Script labels and detach them in the desired size at the perforated points

3. Inserting

Open the viewing window of the handle and insert the label, close the viewing window by pressing the bottom edge

Benefits

- Simple creation of customised Lista labels
- With text, colours, images and barcode generation
- Data import via database connection possible
- High flexibility thanks to diverse label sizes on perforated A4 sheets
- Printable with any commercially available printer

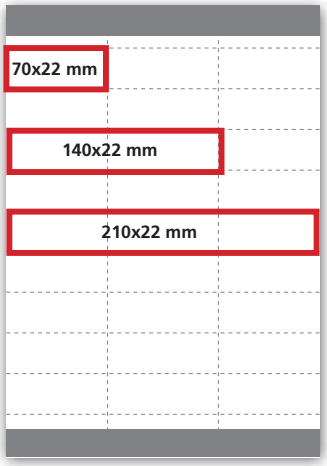
Labels
Multifunctional and simple

The free Lista Script software not only makes it easier to find, manage and distribute inventory items, but also makes replacing and marking the labels a snap. With a variety of label sizes, the drawers can be labelled professionally and neatly with text, barcodes, pictograms, images and colours on the outside or inside, from the handle to the metal separators and plastic boxes.

The A4 sheets for the Lista Script labels can be used very flexibly for the drawer handle and cabinet labelling.



The labels are available in various sizes on perforated A4 sheets of paper.

*** Snap on label holder**
To hold clip-on label holders, for fitting into the slots inside the drawer fronts, see partition material page 990 ff.

Tip

Free label sheet with every cabinet order
Every new Lista drawer cabinet is supplied with matching Lista Script label sheets, to enable neat labelling from the start. More sheets can be ordered on the Lista website. The labels adapted for the labelling software are available as A4 sheets of paper and can be used in any commercially available printer.

Free labelling software available on the internet at www.lista.com/script
